Extension Hair Care

Let's face it, extensions are expensive. In order to protect and lengthen the life of your hair, we recommend the following tips.

STYLING

- + Blow-dry the top of your extensions to prevent moisture buildup. The rest can be air-dried.
- + Brush gently, starting from the ends and moving upward.
- + Brush a few times a day to prevent tangling. Section hair and brush in between extensions.
- + Apply JZ Styles hair serum daily, avoiding the root area.
- + Avoid Brazilian Blowouts, bleaching, and perms.

SLEEPING

- + Sleep in a low braid or ponytail.
- + Sleep on a silk or satin pillowcase.

WASHING & SWIMMING

- + Wash with JZ Styles sulfate-free shampoo and conditioner.
- + Hard water can strip both natural and extension hair of color and essential nutrients. Use soft water if possible.
- + When swimming, coat hair in conditioner and wear in a braid or tight high bun.
- + Be aware, salt water and chlorine can strip hair of color.
- + Keep your hair extensions away from sunscreen.

Tape Ins

- Do not apply conditioner directly to the tape area.
- Do not wash your hair for 24-48 hours after initial installation.

Clip Ins

- We do not recommend sleeping with your clip ins installed.

Return Policy

You can return/exchange the product within **30 days** from the day of receipt if the following criteria are met:

Hair Extensions

The hair has not been worn, damaged, or removed from the original packaging.

Hair Products

The product has not been opened or used.
